INFORMATION FOR CONTRIBUTORS

GENERAL

All manuscripts should be addressed to the Editor, Current Science, P. B. No, 4001, C. V. Raman Avenue, Bengaluru 560 085. Submission of an article implies that it has not been previously published and is not under consideration for publication elsewhere; further, that if accepted, it will not be published elsewhere. Manuscripts of all categories are to be submitted online (www.currentscience.ac.in/moj/o) with a letter of transmis-
sion. The names of all authors and their addresses (including telephone num-
ber, e-mail id, etc.) of all the authors and (if title of the contribution.
Current Answer is a multidisciplinary journal and therefore research and review papers of general significance that are written clearly and well or-
ganized and presented in an accessible way. All papers, submitted and unclassified, will be first assessed by a Reviewing Editor. Papers found unsuitable are to be returned to the authors. The Editors will be kept for statistical review. Authors of these papers will be notified if revision is necessary. The second revision of the paper may be
required if the paper is not acceptable or rejected by the Journal. It may not be
published. A re-submitted manuscript may be rejected if major changes
are not made. Authors whose paper is rejected or returned to authors may be
notified at most once. If a manuscript is returned for major revisions, it will
cannot be considered for publication. Papers returned to authors are not
treated as withdrawn. Manuscripts that are accepted for publication will
be indexed in the electronic databases. All authors will receive a copy of the
published version of their paper. The Editorial Board reserves the right to
decide on the final form of the manuscript. Manuscripts that are accepted for
publication will be reviewed by the Editorial Board and may be rejected if
major revisions are required or if the manuscript is not acceptable for
publication.

Declarations to be made regarding ethical issues

Manuscripts that deal with clinical trials should be accompanied with a statement on informed consent of the patients under study.

However, if human subjects are the subject of a clinical trial, it is essential for the study to have been carried out in accordance with the ethical standards of the country or countries where the research described in the article has been conducted. A declaration that ethical questions must accompany the manuscript.

Supplementary material

Detailed tables can be submitted as supplementary material, which will be published online. If tables with large data are not submitted as supple-
mentary material and are found to be useful for reading, publishing online, the discretion of the Editor, Current Science, may be taken to use the supplementary material online, in the form of a table or other format that is not included in the print version. The authors will be informed about this during the processing of their manuscript.

Any details and queries regarding supplementary material should be addressed to the corresponding author of the paper. The published mate-
rnal cannot be reproduced without permission from the author.

Author conflict of interest

Authors must acknowledge organizations that have provided financial support for their work. Other conflict of interest must be declared while submitting the manuscript.

CATEGORIES OF MANUSCRIPTS

General articles (total 2000 words):

In addition to the usual tables (tables and figures) discuss current trends in research that is likely to be of inter-
est to readers outside the field. These include contemporary topics, sci-
ence policy and science administration, some aspects of the application of science and technology to broader issues in the impact of science and tech-
onology on society/nanomaterials. The articles should include an abstract, an introduction section, brief background at appropriate places, illustrations that will help a general reader, and references.

Review articles (not exceeding 6000 words, cited references to be limited to a maximum of 100), are to be reviewed by the associate editor and by re-
spective sections.

Research articles (not exceeding 6000 words, cited references in any number of articles are to be based on a personal review of the research being done in the field. Articles should be focused and organized, and avoid a majority of the manuscripts.

The main headings should be in bold face. Subheadings should be numbered and should appear in parentheses after the main headings. Subheadings should be in italicized boldface. Main headings should be in roman boldface.

Research articles (not exceeding 6000 words): report research results of major importance. They should include an abstract, an introductory paragraph, and a discussion section. The manuscript should include a minimum of 10 references.

Research communication (not exceeding 2000 words): report important new findings and extend their breadth of interest. The manuscript should in-
clude a brief abstract and an introductory paragraph. Text should NOT be broken up into separate sections.

Correspondence (not exceeding 500 words): includes letters that are of general interest to scientists and technical comments, including those on articles in communications published in Current Science within the previ-
