

CSIR Programme on Climate Change:

Integrated Analysis for Impact, Mitigation and Sustainability (IAIMS)

Last Date of Registration:

25 Feb 2013

NATIONAL WORKSHOP on

CSIR CLIMATE OBSERVATION AND MODELLING NETWORK:

Collaborative Utilization Plan (COMoN-CUP)

22-23 March 2013

CSIR C-MMACS, Bangalore

CSIR Climate Observation and Modelling network (COMoN) has now more than 20 operational climate profilers throughout the country, some of them more than three years old. A wealth of data has been collected over these years; it has also shown the network to be stable and sustainable. COMoN is unique in its scope and coverage; the Network may further expand in the coming years. The proposed Workshop will bring together a group of users, including the COMoN Alliance Partners to evolve value added, multi-disciplinary applications with COMoN data and identify additional data requirements.

The workshop will focus on

- Overview of scope of COMoN Data
- Requirement of Associated data for value added analysis
- Multi-disciplinary applications in different sectors like agriculture, health and energy

The participation in the Workshop will be through both invitation and registration; interested participants from State Govts, industries and the public sector are also welcome. Limited travel and stay support is available to a few young researchers from universities and Govt R&D organizations; please visit Workshop website for details.

Registration: For registration form and details please visit www.cmmacs.ernet.in and <http://www.facebook.com/groups/280078058787595>. For any other details please contact us at goswami@cmmacs.ernet.in (P Goswami); gnm@cmmacs.ernet.in (G N Mohapatra: off: 080-25051331, mobile: 9739466574).
