Can you Create a University around a Powerful Idea?

Institute of Trans-disciplinary Health Sciences and Technology (IHST) is India's first university dedicated to the cause of revitalizing India's medical heritage. The idea of this unique learning institution is based on the pioneering work of 20 years by the Foundation of Revitalization of Local Health Traditions (FRLHT).

The founders of IHST envision a leadership role for the University to create a movement that promotes Health for All. IHST has a vision of modernizing global healthcare in the 21st century by combining India's traditional health sciences and practices with western biomedical sciences, technology and the social sciences. IHST has set goals for Revitalizing Indian Medical Heritage through conservation of medicinal flora, trans-disciplinary research, integrative healthcare services and innovative education.

The Idea Needs a Leader

The idea called IHST needs a leader who can dream of developing an institution that will impact on reaching *health for all*, catalysed by revitalizing Indian medical heritage. In the post of Director, this leader will give life to the vision of IHST and in an entrepreneurial spirit establish this first-of-its-kind university in India. Under the leadership of the Director, IHST will not only become a learning hub of trans-disciplinary health sciences but also evolve as an institution that is the nerve center of innovation for the health sector.

IHST calls for applications from those who have the passion to dream and have proven track record of converting their dreams into a success story. If you have the drive in you to lead yet another big idea, get in touch with us.

For more details on IHST University and the role, please visit <http://www.ihstuniversity.org>
