

# Skin, Cells and Skin Grafts

an exhibition about the skin

swissnex India presents a unique opportunity to meet the experts from the University Hospital of Lausanne and learn more about how research into the skin is advancing therapeutic options for burn victims and others, and revealing the secret beauty of this delicate yet vital barrier to the outside world. After all, it's skin deep.

Come, explore a series of remarkable photographs and videos on the skin and interact with the experts who designed the exhibition - Prof. Wassim Raffoul, Prof. Lee Ann Laurent-Applegate and Murielle Michetti.
