

Divecha Centre for Climate Change
Indian Institute of Science, Bengaluru

**Looking for Experts in the Areas of Urban Water
Management and Water–Energy–Food nexus**

The Divecha Centre for Climate Change was established at Indian Institute of Science in January 2009. The primary goal of this centre is to understand climate variability and climate change and its impact on the environment. Divecha Centre hosts the South Asia regional office of Future Earth, in partnership with which it has recently instituted a Waters Solutions Lab. The objective of the Solution Lab is to address water sector challenges in India with a special focus on challenges faced by the city of Bengaluru. The lab will work with national and international partners to develop practical solutions to water-related problems by bridging the gap between science and policy and between knowledge and practice to address sustainable development goal 6 ('Ensure availability and sustainable management of water and sanitation for all').

Applications are invited for the following posts on contract basis. Project scientists and Project Assistants to help develop and carry out activities of the Water Solution Lab, assist with water related activities and undertake water related research.

Applications are invited for the following posts on a contract basis. Job duration is initially for one year and extendable for two more years upon satisfactory performance.
