Classes begin : 22 July 2019

For further details and application: www.ibab.ac.in

Highlights
A novel, highly interdisciplinary programme that will introduce students to the frameworks and tools for analysing and formulating public policies; provide them with economic reasoning skills to understand how markets function and to evaluate policy alternatives; and empower them to gather, evaluate, and process data from the world outside the laboratory, synthesize the data and effectively communicate it to a varied audience.

Comprehensive curriculum with an eclectic mix of courses including public policy analysis concepts; economic reasoning and public policy; evidence informed policy; statistics; programming; data visualization; scientific writing and communication.

Almost 100% placement of IBAB students for nearly 2 decades.
