Junior Research Fellowships in a DBT-funded Project at SRM University-AP, Andhra Pradesh

Two JRF positions are available in the Department of Biology at SRM University-AP, Andhra Pradesh in the area of regulation of gene expression in a project titled "Understanding the molecular mechanisms underlying the extreme differential level of gene expression between human and animal rotaviruses", funded by Department of Biotechnology. The project involves identification of translational enhancers, repressors and mRNA destabilization elements in rotaviral mRNAs and identification of host factors binding to the elements and development of efficient mammalian expression vectors. The candidates should possess M.Sc. or M.Tech. with basic molecular biology knowledge. The candidates have the opportunity to register for the Ph.D. programme in future, if successful in the entrance examination and interview conducted twice in a year.

Interested candidates can send their applications to Prof. C. Durga Rao, Professor and Assoc. Dean-Sciences, School of Engineering and Sciences, SRM University-AP, Andhra Pradesh 522240 or to the email address at durgaraoc@srmmap.edu.in on or before April 10, 2021.
