

Divecha Centre for Climate Change

The Divecha Centre for Climate Change was established at Indian Institute of Science in January 2009. The primary goal of this centre is to understand climate variability and climate change and its impact on the environment. The centre has been involved in identifying technologies to mitigate climate change in collaboration with entrepreneurs and different engineering departments at the institute. The centre is also working with Grantham Institutes at the Imperial College, London and London School of Economics, on the impact of Climate Change on water, energy and food.
