We are glad to inform you that Adhichunchanagiri University-Centre for Research and Innovation (ACU-CRI) has been able to start assisting the industries, R&D organizations and higher education centres by providing highly sophisticated testing, material analysis facility and training programmes. The Centre for Research and Innovation has a high-end analytical instrument facilities for researchers, students and R&D industries, who require highly sophisticated analytical instruments for chemical, atomic and spectral analysis of materials and chemical substances. The sophisticated instruments includes the following facilities like: FTIR, PXRD, UV VIS, HPLC, Lyophilizer, UTM (polymer), Impact Testing (polymer), RT PCR, Fluorometer, Gel doc, Chemi doc, Immuno-Fluorescence Microscope, LN2, Multifrequency Ultrasonic Interferometer, Abbemat 300 Automatic Refractom, CI Surface and Interfacial Tensiometer-Automatic, Contact Angle Measurement System, Laboratory Density Meter, Pico pH/Conductivity Meter, Bio Vis Particle Size Analyzer and Cell Culture. 

The aforementioned facilities are also extended to all the external researchers from other institutions and also to industries for characterization of their samples under the guidance of well-trained faculty members at nominal charges. For further details you are requested to go through our website https://acu.edu.in/ 

For any other queries with regard to charges, submission of samples, payment details, etc. you can contact:
