Sree Ramakrishna Paramahamsa Research Grant 2023 in the field of Translational Biomedical Sciences

The Sree Padmavathi Venkateswara Foundation (SreePVF) located in Vijayawada, Andhra Pradesh, is a private foundation dedicated to promoting excellence in medical education and healthcare. With a vision to promote innovation and progress in medicine, SreePVF established the Sree Ramakrishna Paramahamsa Research Grants in 2019. This annual grant aims to support individuals and groups involved in impactful ‘bench to bedside’ translational research.

Scope and focus areas: The grant invites applications from any branch of science and technology that involve cutting-edge ‘Bench to Bedside’ translational projects. These projects should lead to interventions that enhance the health of individuals and the public. Eligible projects are those focused on addressing disease-related topics using advanced techniques and analyses to provide translational solutions for illness or clinical problems. The primary requirement of the grant is that the proposed research, within the 3-year duration, should yield tangible outcomes that can be immediately translated into accessible and cost-effective innovative tools, products, treatments or interventions, benefiting a large portion of the population. However, this grant does not cover climate change, agricultural sciences and ecological sciences.

Eligibility: Interested individuals and teams affiliated with universities, research and development institutions, medical centres, and recognized non-profit research organizations in India are eligible to apply. The minimum eligibility criteria for applicants is a Ph.D./M.D./M.S. degree or equivalent. The lead Principal Investigator (PI) must be below 50 years of age (with a 5-year age exception for women candidates).

Budget: The grant offers a maximum budget of Rs 3 Crores for a three-year project. Eligible expenses include equipment, research personnel, consumables, local and international travel, local hospitality, contingency, overheads, outsourcing and other project-related costs such as training and awareness programmes, workshops, publications, review meetings, based on the project's requirements.

Application procedure: For more information and to access the application form, please visit: https://sreepvf.org/biomedical-science/

Applications must be submitted to sreepvfgrants@gmail.com

The deadline for submitting the three-year proposal is 18 September 2023.

---

Junior Research Fellow (1 No.)

Applications are invited from eligible candidates for the temporary position of Junior Research Fellow (1 no.) under DBT-Wellcome Trust India Alliance Sponsored Project (SP-302) in the Developmental Biology Group to work on Heart Regeneration.

Detailed advertisement is available on the Institute’s website www.aripune.org

The last date for submission of online application is 25 July 2023.
