

# MEETINGS/SYMPOSIA/SEMINARS

## XIII AIRAPT Conference on High Pressure Sciences and Technology

Place: Bangalore, India

Date: 7-11 October 1991

Topics include electronic structure, transport and optical properties, phase transitions, materials synthesis, biological applications, liquid crystals and polymers, geophysical and oceanographic applications, shock-wave studies, instrumentation and metrology, high-pressure engineering and safety, superhard materials.

## IUPAC-NOST International Symposium on Enzymes in Organic Synthesis

Place: New Delhi, India

Date: 6-9 January 1992

All aspects of 'enzymes in organic synthesis' will be covered. Specifically the following major topics are planned: enzyme structures, activity, mechanisms, mimics; enantiomerically pure chiron synthesis with enzymes and micro-organisms; production of pharmaceuticals and other fine organic chemicals with enzymes and micro-organisms; catalytic antibodies; new aspects of enzymes in organic synthesis.

## 10th International Conference on Computing Methods in Applied Sciences and Engineering

Place: Paris, France

Date: 11-14 February 1992

Topics include basic numerical methodology, parallel computing, quantum chemistry, combustion, domain decomposition, Maxwell equations, hypersonic flows, solid and structural mechanics, optimization and control, turbulence, computational physics and chemistry, computer and software environments of scientific computing.

## 5th International Meeting on Statistical Climatology

Place: Toronto, Canada

Date: 22-26 June 1992

The meeting is co-sponsored by the World Meteorological Organization, the Atmospheric Environment Service of Canada and the American Meteorological Association. The theme sessions will emphasize climate change and, particularly, the detection of the enhanced-greenhouse-gas effect.

## 6th FAOB Congress of the Federation of Asian and Oceanian Biochemists

Place: Shanghai, China

Date: 16-21 November 1992

Topics include the genome and gene expression, oncogenes, growth factors and biochemistry of malignancy; polypeptides and proteins, enzymes and metabolic regulation; biomembranes and bioenergetics, glycoconjugates, molecular and cellular immunology; biotechnology, agricultural biochemistry, medical biochemistry; biochemical education.
