

A Short-term training course on Techniques in Isolation and Bio-immunological characterization of Proteins

The Institute for Research in Reproduction (ICMR) is happy to announce a DBT-sponsored short-term training course on **Techniques in Isolation and Bio-immunological Characterization of Proteins** from 13 to 31st August, 1993. The training course will cover various separation techniques; analytical techniques and detection techniques used in the isolation and characterization of proteins.

Applications are invited from mid-career scientists/technologists (preferably below 40 years) working on regular positions in Universities/National Laboratories/Research Institutions/in-house R & D centres, etc.

The candidates should apply giving details in the following format.

- i) Educational qualification, research experience, age.
- ii) Present place and nature of work.
- iii) Facilities for R & D available in candidate's laboratory.
- iv) Present and future research interests of candidates laboratory.
- v) How candidate proposes to make use of the training in his/her research programmes.

About 15 candidates will be selected. The participants will not be charged registration fees. However, TA/DA will have to be met by the sponsoring Institutions. Accommodation for outstation candidates will be made available at subsidized rates.

Applications through proper channel should reach the Course Director, Dr A. R. Sheth or the Convener, Dr S. B. Moodbidri, Institute for Research in Reproduction, Jehangir Merwanji Street, Parel, Bombay 400 012, on or before **1 July 1993**. Selected candidates will be informed by 15 July 1993.
