POSTDOCTORAL POSITIONS

The National Centre for Biological Sciences (NCBS) has been established by the Tata Institute of Fundamental Research (TIFR). It is located on the campus of the Indian Institute of Science, Bangalore.

A small number of NCBS-funded fellowships are available for postdoctoral positions each year. Applications from those with a Ph D degree, or equivalent, will be considered twice a year (late February and late August). Applicants should summarize their recent research experience and include names and addresses of three persons who can be contacted for a critical evaluation of the applicant's research.

Research at NCBS is in the following areas:

1. Papillomavirus transcription and assembly in cervical cancers and during skin differentiation (Sudhir Krishna)
2. Dynamics of protein folding (Jayant Udgaonkar)
3. Gene expression and regulation in the nervous system (Mitradas Panicker)
4. Molecular genetics of olfaction (Gaiti Hasan)
5. Ion transport through biological membranes (Mathew K. Mathew)
6. Chemosensory genetics (Obaid Siddiqi)
7. Development of the nervous system and muscles (K. VijayRaghavan)
8. Axonal path finding and target recognition by neurones (M. G. Muralidhar)
9. Characterization of CD4 T cell function in infectious diseases (Girija Muralidhar)

Applications may be sent to the Administrative Officer at the above address.
