

Macsyma

Finally, Math Software that understands English!

Describe a problem in your own words and Macsyma returns executable tips! Solve many problems without knowing command names and syntax! The future is here, now, in Macsyma 2.2, the most capable and reliable symbolic numerical math available!

- 1100+ examples
- 1200+ tasks with solutions by topic!
- Compose your own commands with type-in command templates!
- Pre- and post-processing for its Finite Element companion, PDEase2D! (PDEase3D is coming soon!) Also available on Sun, HP, IBM and SGI!

"one of the best (if not the best) software products for scientific computation that I have come across... a few weeks with it and you will wonder how you ever managed without it... the installation itself is extremely simple, straightforward and fast... one of the best features of Macsyma is its ease of use... the numerical analysis capabilities are formidable... spectacular graphics... there is no doubt that a practicing scientist/engineer would find that Macsyma leads to a substantial enhancement in productivity in research, development and teaching." Software Review, Current Science, 25 Aug '97.

Leave your Finite Element headaches behind with PDEase!

- 140 Executable sample problems in fields like Heat Transfer & Diffusion, Solid Mechanics, Fluid Mechanics, Electromagnetics, Chemical Reaction Diffusion, Quantum Mechanics, and Financial Derivative Analysis
- On-line browser and hypertext links
- Upto 32 non-linear partial differential equations
- Interactive Animated Graphics
- DataViewer
- Automatic Grid Generator and Error Norms
- Symbolic Equation Parser
- Import CAD Drawings for Engineering analysis
- Link to Macsyma

Finite Elements made friendly. No Mesh, No Fuss!

EXTEND™

The most powerful, versatile yet easy-to-use Simulation program ever created!

- ✓ Evaluate Ideas before implementation!
- ✓ Perform scientific experiments!
- ✓ Test "what-if" scenarios!
- ✓ Prototype Designs!

Available for Windows & Macintosh!

Build-it, trouble-shoot it, improve it... by creating a virtual system in Extend! Visualize the system or process, make changes interactively, then analyze the results!

Additional Libraries available for Biology, Analytical Chemistry, Neural Networks, Chemical Process Control, Pulp and Papermaking, Bulk Manufacturing, Electronic Communication Systems, Manufacturing, Business Process Reengineering, etc.

Sensitivity Analysis
Object-oriented
Drag & Drop
Authoring
Animation
Data Import/Export
Unlimited Hierarchy

Features!

Programming Environment
Queuing & Monte Carlo
Attributes & Priorities
Interactive Control
Linear & Non-Linear
Real Time Connectivity
400+ Built-in Functions

DEPARTMENT OF EARTHQUAKE ENGINEERING UNIVERSITY OF ROORKEE, ROORKEE

No. EQD/EST/ADVT/4979

22 October 1997

Applications on plain paper, giving full details of educational qualifications, experience, etc., are invited from Indian nationals for purely temporary positions on consolidated fellowship as per details given below under BRNS-funded research project entitled 'Dynamic Uplift Analysis of Reactor Building' for a period of three years or till completion of the project whichever is earlier.

Category	No. of posts	Fellowship/stipend	Qualification
Research Associate	One	Rs 3500/- p.m. Consolidated (fixed)	Three years of research, design and development experience after M.E./M.Tech. in Civil (Structural and Geotechnical) Engineering or Earthquake Engineering

Applications should reach the Office of Professor and Head, Department of Earthquake Engineering, University of Roorkee, Roorkee by 15 December 1997. Attested copies of degree certificates, marksheets and testimonials should be attached with the applications. The application should also be accompanied by a crossed IPO of Rs 10/- drawn in favour of Registrar, University of Roorkee, Roorkee. Incomplete application, or applications received late will not be entertained in any case.

- Note:
1. Selected candidates may be assigned with field work.
 2. Other things being equal preference will be given to SC/ST candidates.
 3. Terms and conditions of the fellowship will be governed by the University rules and regulations as applicable to such research project. No TA/DA will be paid for attending the interview.
