Monsanto Company, an 85 per cent-owned subsidiary of Pharmacia Corporation, is a leading global provider of technology-based solutions and agricultural products that improve farm productivity and food quality.

Monsanto has been in India for 50 years. Over the past 25 years, it has been providing farmers with products that have contributed substantially to agricultural productivity and crop management practices. Monsanto is committed to working with the appropriate government/statutory authorities, to develop useful technologies through local Indian institutions and companies, in full compliance with India’s laws and safeguards. Monsanto believes in working with and co-operating closely with the public and private sectors and research institutions to ensure the farmer’s right to choose the most appropriate technologies, to boost yields in keeping with the principles of sustainable development.

We are looking for eligible candidates to fill the following positions.

Position No: BNG/01/001
Scientist: The candidate should possess at least a Post Graduate degree in Life Sciences (Agriculture/Biochemistry/Biotechnology/Molecular Biology/Botany/Micro Biology). The candidate must have experience in molecular biology techniques and familiarity with DNA sequence analysis, PCR primer designing and biological databases.

Fresh Doctoral candidates will also be considered.
Applicants must possess excellent team interaction skills.

Position No: BNG/01/002
Sr. Scientist: The candidate must possess a Doctoral degree in Plant Science (Plant Physiology/Plant Biochemistry/Plant Molecular Biology). The candidate must have experience in Physiological & Biochemical Analysis of plants, Molecular analysis of transgenic plants and statistical analysis of data.

Outstanding Life Science Post Graduates with experience will also be considered.
Applicants must possess excellent team interaction skills.

Position No: BNG/01/003
Scientist: The candidate must possess a Doctoral degree in Biological Sciences with a strong background in Plant Biochemistry/Plant Physiology/Plant Genetics/Plant Molecular Biology. One or two years of research experience in scientific editing and database management and application of bioinformatic tools is essential.

Outstanding Science Post Graduates will also be considered.
Applicants must possess excellent team interaction skills.

Compensation packages for all positions are highly attractive. Interested candidates may send in their resumes with the position number superscribed on the envelope (if sending it by ordinary post) or mentioned in the subject (if sending it by email) by 15th January 2001 to either of the addresses mentioned below.
