## Required Head – Information Technology

NIIT is looking for someone to head the Information Technology Division at an upcoming university in Northern India. The university is poised to become one of the premium institutions that will be offering courses in the areas of Information Technology, Management Studies, Plant Biotechnology, Hospitality Services and Tourism. The university will have technology infrastructure comparable to the best in the world to enable students, teachers and the administration to gain fully from the potential of technology for teaching, learning and management .

With the investment in excess of Rs 15 crores over a period of three years, the university is being set up with state-of-the-art technology infrastructure including optical fibre cabling, high speed internet connections, micro-processor labs and client/server computing labs.

The job responsibilities would entail building an overall design of technology infrastructure at the university campus, setting up and maintaining the IT Management Systems and Communications, managing IT/MIS Network & Support and formulating guidelines/processes/standards for operations.

The incumbent should have:

- At least 15 years of experience of which at least 5 years should be at the management level in information technology.
- Experience in planning and setting up of IT infrastructure, including optic fibre networking is essential.
- Expertise in information systems planning, project management principles, database management systems, client/server applications and distributed information systems.
- Strong conceptual skills, interpersonal and supervisory skills.

Candidates with prior experience in building and managing a technology integration project in a large-sized educational institution would be preferred.

Remuneration shall not be a constraint for the right candidate.

Interested candidates may send their resume by e-mail to [itheadresume@niit.com](mailto:itheadresume@niit.com) or by post to:
