

Opportunity for Scientists

Molecular Connections (MC) is a pioneering in-silico research and bioinformatics company based in Bangalore. MC invites Life Sciences and Chemistry Doctorates (PhDs) to be part of its in-silico research services teams.

Role and Responsibilities:

You will be part of an accomplished scientific team and play a key role in building and maintaining scientific databases, informatics tools and technologies for proteomics and genomics research. You will be working closely with the Product Management, Software and Quality Control teams on customer driven projects to enhance internal productivity and develop new projects.

Qualifications:

- Doctorates (PhDs), both fresh and experienced, from various streams including microbiology, biochemistry, molecular biology, genetics, genomics, proteomics and chemistry related areas.
- In-depth knowledge of their field of expertise.
- Exposure to genomics/proteomics technologies and bioinformatics – an added advantage.
- Self-starter with high level of motivation, good interpersonal and communication skills
- Experience in Data curation and annotation and building databases from literature will be preferable.

Remuneration will be market driven and attractive. All positions are based in Bangalore.
