The SBRI-India Global Infectious Diseases Training Program invites applications from promising Indian Ph.D. students and postdoctoral scientists for advanced training in Malaria, Leishmaniasis, Tuberculosis, and other intracellular pathogens.

Fellowships will be funded for postdoctoral scientists to train on collaborative projects at Jawaharlal Nehru University (JNU) or the International Centre for Genetic Engineering and Biotechnology (ICGEB) and at a laboratory at the University of Washington (UW) or Seattle Biomedical Research Institute (SBRI) in Seattle, WA, USA. Additional fellowships are available for students in Ph.D. Degree programs at JNU or ICGEB to work on such projects in the U.S. Laboratories.

Applicants will be assessed on the basis of academic record, letters of recommendation, a statement of career goals related to global infectious diseases, and a brief statement of research interests. In addition, for postdoctoral scientists the publication record will be considered.

Please visit our website at http://sbri-india gid.org for further details about the program and applications. Applications for the first round should be received by March 20, 2007. The Training Program will also be sponsoring workshops and video lectures.

This program is supported by the Fogarty International Center of the U.S. National Institutes of Health and is directed by Drs. Kenneth Stuart and Marilyn Parsons of SBRI, and Rentala Madhubala of JNU.
