

Hands on Training on Biotechnological Techniques for Monitoring Quality, Multiplication and Conservation of Medicinal Plants

Sponsored by: Department of Biotechnology, New Delhi, India

30 June – 11 July 2008, TERI (The Energy and Resources Institute), New Delhi

About the workshop

The workshop module is designed to provide the participants exposure to the latest biotechnological techniques for multiplication, conservation and quality of medicinal plants through a blend of theoretical and 'hands on' training activities.

The training includes

- Quality control and standardization of medicinal plants
- Handling of HPLC and GLC and its applications
- Extraction of medicinal plants and TLC analysis
- IPR issues in biotechnological inventions and biodiversity act
- Biotechnological techniques for multiplication of elite medicinal plants
- Emerging techniques for conservation of medicinal plants
- Application of molecular markers, for medicinal plants characterization

Who should participate?

Teachers from Government or private institutions: Preference will be given to college/university teachers holding regular positions and sponsored by their parent institutions.

Registration

Registration fee is exempted.

Number of seats available: 15

Last date of registration: **10 June 2008**

Registration form can be downloaded from TERI website: www.teriin.org

Registration form to be sent to:

Dr Nutan Kaushik, Fellow and Area Convenor, Plant Biotechnology
