

EMBO Young Investigators are some of Europe's best young group leaders selected for the high quality of their research. They form a prestigious scientific network.

PhD students and post-docs working in EMBO Young Investigator laboratories benefit from EMBO training opportunities, networking events and laboratory exchanges.

**Applications can only be made directly to the EMBO Young Investigator through contact information on the website below.**

An initial round of interviews for applicants from India will be conducted in Bangalore from 10–12 November 2008. To qualify for the interviews, please submit your application by 17 October directly to the laboratory of interest. EMBO will invite successful applicants after 31 October. Travel support available.

## Apply for PhD or post-doc positions in EMBO Young Investigator laboratories

Post-doc	Rob Arkowitz Yeast cell biology Yeast cell biology Nice, FR	Post-doc	Henrik Kaessmann Evolutionary genomics Lausanne, CH
Post-doc	Buzz Baum Cell and tissue morphogenesis London, UK	Post-doc	René Ketting priRNA biogenesis and function Utrecht, NL
Post-doc	Sigal Ben-Yehuda Microbial cell biology Jerusalem, IS	Post-doc	Bruno Klaholz Translation and transcription complexes Illkirch, FR
Post-doc	Michael Boutros Functional genomics Heidelberg, DE	Post-doc	Jan Lohmann Plant stem cell regulation Heidelberg, DE
Post-doc	Vítězslav Bryja Wnt signalling Brno, CZ	Post-doc	Miguel Manzanares Embryonic heart development Madrid, ES
Post-doc	Dirk Bumann Host-pathogen interactions Basel, CH	Post-doc	Oscar Marin Developmental neurobiology Sant Joan d'Alacant, ES
Post-doc	Fernando Casares Eye development Seville, ES	Post-doc	Jean-Christophe Marine Regulation of p53 Gent, BE
Post-doc	Fabrizio Chiti Protein aggregation and disease Firenze, IT	Post-doc	Pascal Meier Apoptosis and cancer research London, UK
PhD	Vincenzo Costanzo DNA damage repair London, UK	Post-doc	Ruth Palmer Signalling in Drosophila Umeå, SE
Post-doc	Fabrizio d'Adda di Fagagna Cellular senescence Milan, IT	Post-doc	Anastassis Perrakis Structure-function studies of autotaxin Amsterdam, NL
PhD	Jiri Damborsky Protein engineering Brno, CZ	Post-doc	Christian Schlötterer Evolution Gene expression analysis Vienna, AT
Post-doc	Jan-Willem de Gier Protein secretion Stockholm, SE	Post-doc	Victor Sourjik Bacterial signalling Microevolution of bacterial networks Heidelberg, DE
PhD	Mónica Bettencourt Dias Centrosome biogenesis and evolution Oeiras, PT	Post-doc	Katja Sträßer Gene expression Munich, DE
Post-doc	Alex Hajnal <i>C. elegans</i> genetics Zurich, CH	Post-doc	Luca Tamagnone PhD programme in cancer research Semaforins in cancer Candiolo, Torino, IT
Post-doc	Volker Haucke Molecular & cellular neuroscience Berlin, DE	Post-doc	Pascal Therond Hedgehog in development Hedgehog in development Nice, FR
PhD	Torben Heick Jensen mRNP biogenesis and metabolism mRNP biogenesis and metabolism Aarhus, DK	Post-doc	Bojan Žgrovčić Computational biophysics Computational biophysics Split, HR
PhD	Alicia Hidalgo Drosophila neurodevelopment Birmingham, UK	Post-doc	Pascale Zimmermann Syntenins in cancer PDZ signalling PDZ signalling Syntenins in cancer Leuven, BE
Post-doc	Thorsten Hoppe Protein degradation in development and aging Cologne, DE		
Post-doc	Johanna Ivaska Integrins in cancer Turku, FI
