

ATTENTION PLANT TAXONOMISTS!

During recent years, there is spurt in the plant taxonomy research in our country resulting in the publication of new species and records of new data on distribution of plants in India. Since the information is scattered in various journals, it is difficult for the research students and stakeholders to access this information. Therefore, Botanical Survey of India (BSI) has decided to publish a consolidated document wherein all the plant discoveries reported during the year are compiled. We appeal to all those who have published new plant taxa or new records for India during 2008, to please send the information in soft copy with the colour photographs or line drawings and images of the type material to the undersigned by return post or by e-mail (m_sanjappa@yahoo.co.in, publication@bsi.gov.in or pchanna@gmail.com). The authentic herbarium specimens of all new plant discoveries may be deposited in any of the BSI circle herbaria but preferably in Central National Herbarium, Howrah for better maintenance, and accessibility to all those who are interested.
