No. ISR/REC/2009/1

The Science and Technology Department, Government of Gujarat established the Institute of Seismological Research (ISR) which is planned to be developed into an international institute dealing with all the aspects of Seismology and Engineering Seismology. The ISR is registered as a society under the societies act. The ISR is having its own campus building (9000 sq m) and residential complex (10,000 sq m) in a sprawling and picturesque area on the banks of Sabarmati river. ISR is running 50 broadband seismograph stations (20 connected by VSAT) and 50 Strong Motion Accelerographs in Gujarat. Crustal deformation studies are initiated with 30 permanent GPS stations. ISR is also in possession of all types of Geophysical instruments for delineating faults and structures. ISR also has projects for microzonation in different parts of Gujarat. Three Multiparametric Geophysical observatories for earthquake prediction research are being set up. The ISR invites application for the following posts in the field of Earthquake hazard & Risk assessment, Earthquake monitoring and network management, Seismic characterization, Microzonation, Geophysical surveys, crustal deformation, Palaeoseismology and earthquake prediction:
