GO GREEN!
GO ELIX!

ELIX FOR EXCELLENT WATER QUALITY. ELIX FOR PLANET EARTH.

The Elix Advantage 3 water purification system is just one among several initiatives to demonstrate Millipore’s leadership in sustainability. A water purification system of the future that employs an innovative technology to reduce wastage of precious tap water and electricity while reducing its carbon footprint. The advanced Elix EDI Technology produces high quality pure water consistently and economically without the need for expensive chemicals for regeneration or for maintenance.

Here’s how the Elix helps reduce wastage compared to distillation:

<table>
<thead>
<tr>
<th>Technology</th>
<th>Energy Cost/Year</th>
<th>Water Cost/Year</th>
<th>CO₂ Emission/year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Distillation (DW)</td>
<td>Rs. 64860</td>
<td>Rs. 44650</td>
<td>2210 Kg</td>
</tr>
<tr>
<td>Elix Advantage 3</td>
<td>Rs. 3102</td>
<td>Rs. 5828</td>
<td>101 Kg</td>
</tr>
</tbody>
</table>

*Study in Millipore Japan. Calculation based on 20L/day water requirement, over 22 days in a month, for 12 months. Water and power rates used for calculation are as applicable in 2010 in Japan. 15≈Rs. 47/. These calculations are typical and may vary depending on local conditions.

To reduce your feed water and electricity bills every month while producing pure water
